

HR Chromosome 10

Catalog No.:

HR-10.1, 25 Reactions HR-10.2, 25 Reactions HR-10.3, 25 Reactions

Product Specifications

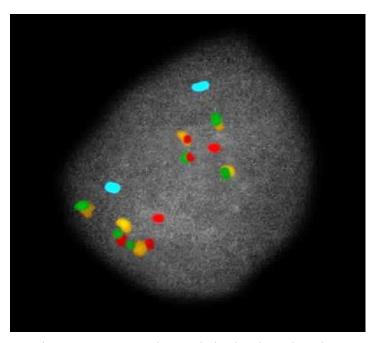

High Resolution Chromosome 10 probe is a multicolored chromosome mix which detects all numerical abnormalities and most balanced and unbalanced structural aberrations, including characterization of "add" and "marker" chromosomes. The labeled targets are equidistantly assigned down the length of chromosome 10.

Three variations of the HR Chromosome 10 Probe mix are offered:

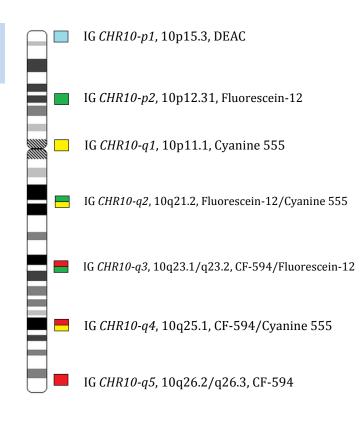

HR-10.1 **Instant 15 minute Hybridization**

HR-10.2 Rapid 3 hour Hybridization

HR-10.3 Overnight 16-21 hour Hybridization

HR Chromosome 10 probe mix hybridized to a lymphocyte.

Not drawn to scale.

ASR: Analyte Specific Reagent, analytical and performance characteristics are not established.
