Innovative FISH Probes

# HR Chromosome 15

Catalog No.: HR-15.1, 25 Reactions  
HR-15.2, 25 Reactions  
HR-15.3, 25 Reactions

## Product Specifications

High Resolution Chromosome 15 probe is a multicolored chromosome mix which detects all numerical abnormalities and most balanced and unbalanced structural aberrations, including characterization of “add” and “marker” chromosomes. The labeled targets are equidistantly assigned down the length of chromosome 15.

Three variations of the HR Chromosome 15 Probe mix are offered:

- HR-15.1 Instant 15 minute Hybridization
- HR-15.2 Rapid 3 hour Hybridization
- HR-15.3 Overnight 16-21 hour Hybridization

Not drawn to scale.

HR Chromosome 15 probe mix hybridized to a lymphocyte.

ASR: Analyte Specific Reagent, analytical and performance characteristics are not established.
