

## HR Chromosome 16

**Catalog No.:** 

HR-16.1, 25 Reactions

HR-16.2, 25 Reactions

HR-16.3, 25 Reactions

## **Product Specifications**

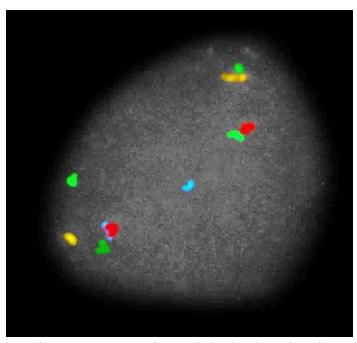

High Resolution Chromosome 16 probe is a multicolored chromosome mix which detects all numerical abnormalities and most balanced and unbalanced structural aberrations, including characterization of "add" and "marker" chromosomes. The labeled targets are equidistantly assigned down the length of chromosome 16.

Three variations of the HR Chromosome 16 Probe mix are offered:

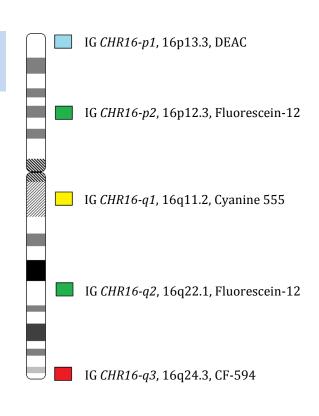

HR-16.1 **Instant 15 minute Hybridization** 

HR-16.2 Rapid 3 hour Hybridization

HR-16.3 Overnight 16-21 hour Hybridization

HR Chromosome 16 probe mix hybridized to a lymphocyte.

Not drawn to scale.

ASR: Analyte Specific Reagent, analytical and performance characteristics are not established.
