Innovative FISH Probes

# HR Chromosome 17

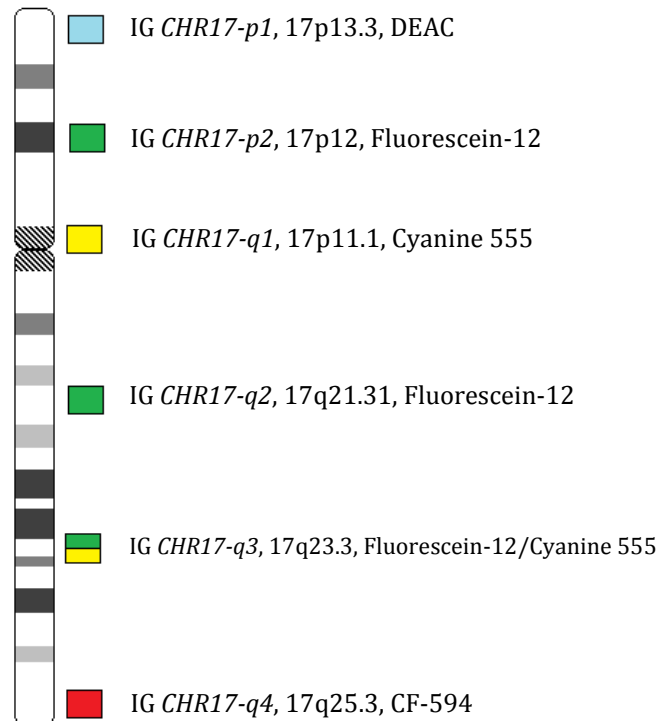

Catalog No.: HR-17.1, 25 Reactions  
HR-17.2, 25 Reactions  
HR-17.3, 25 Reactions

## Product Specifications

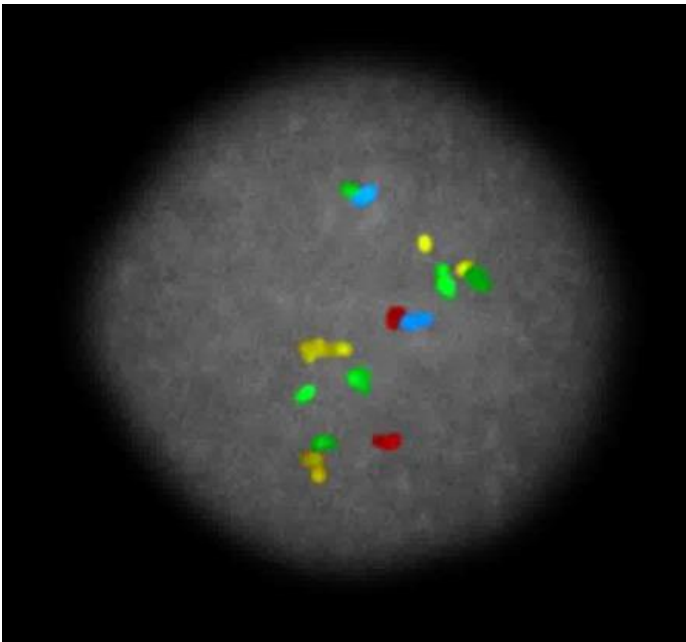

High Resolution Chromosome 17 probe is a multicolored chromosome mix which detects all numerical abnormalities and most balanced and unbalanced structural aberrations, including characterization of “add” and “marker” chromosomes. The labeled targets are equidistantly assigned down the length of chromosome 17.

Three variations of the HR Chromosome 17 Probe mix are offered:

- HR-17.1 Instant 15 minute Hybridization
- HR-17.2 Rapid 3 hour Hybridization
- HR-17.3 Overnight 16-21 hour Hybridization

Not drawn to scale.

HR Chromosome 17 probe mix hybridized to a lymphocyte.

ASR: Analyte Specific Reagent, analytical and performance characteristics are not established.
