HR Chromosome 19

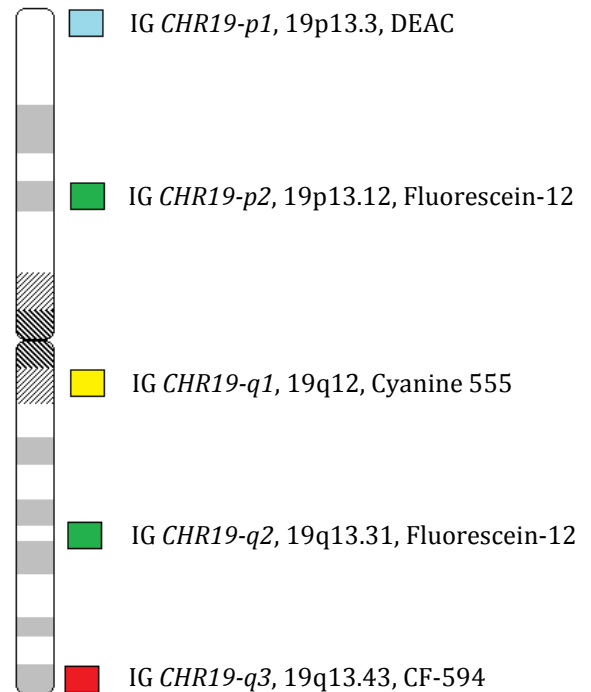

Catalog No.: HR-19.1, 25 Reactions
HR-19.2, 25 Reactions
HR-19.3, 25 Reactions

Product Specifications

High Resolution Chromosome 19 probe is a multicolored chromosome mix which detects all numerical abnormalities and most balanced and unbalanced structural aberrations, including characterization of “add” and “marker” chromosomes. The labeled targets are equidistantly assigned down the length of chromosome 19.

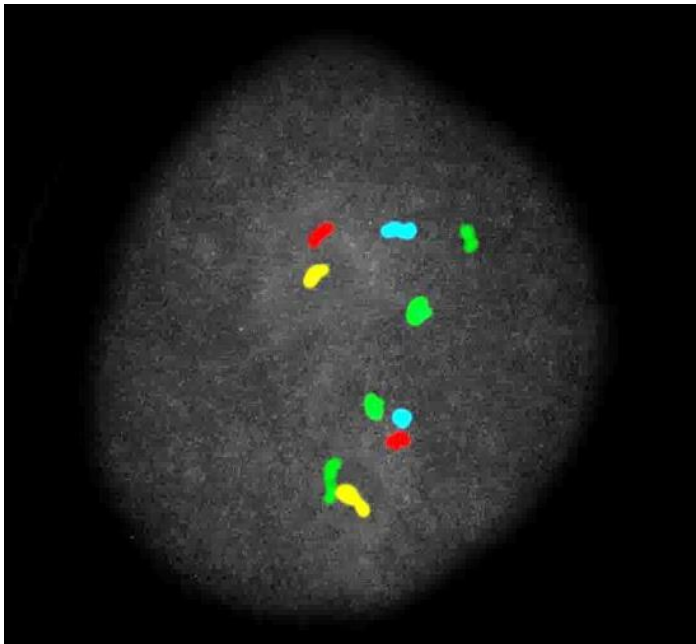

Three variations of the HR Chromosome 19 Probe mix are offered:

- HR-19.1 Instant 15 minute Hybridization
- HR-19.2 Rapid 3 hour Hybridization
- HR-19.3 Overnight 16-21 hour Hybridization

Not drawn to scale.

ASR: Analyte Specific Reagent, analytical and performance characteristics are not established.

HR Chromosome 19 probe mix hybridized to a lymphocyte.
