HR Chromosome 2

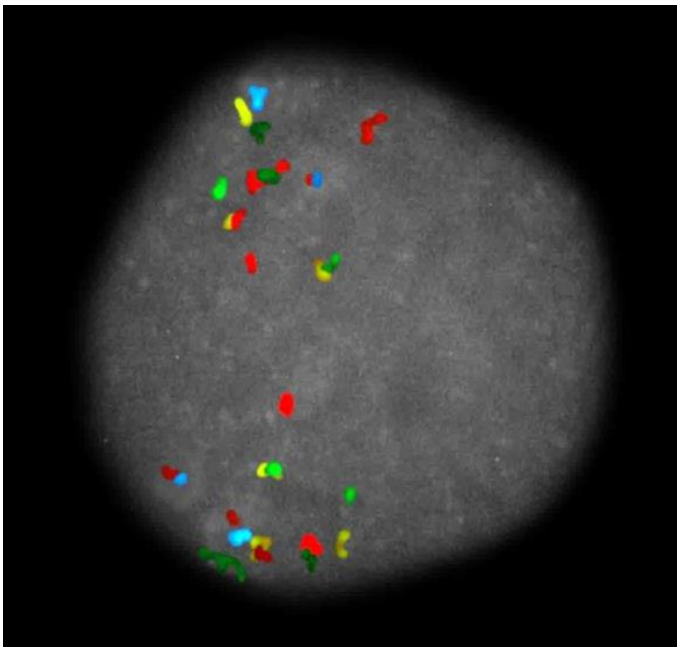

Catalog No.: HR-2.1, 25 Reactions
HR-2.2, 25 Reactions
HR-2.3, 25 Reactions

Product Specifications

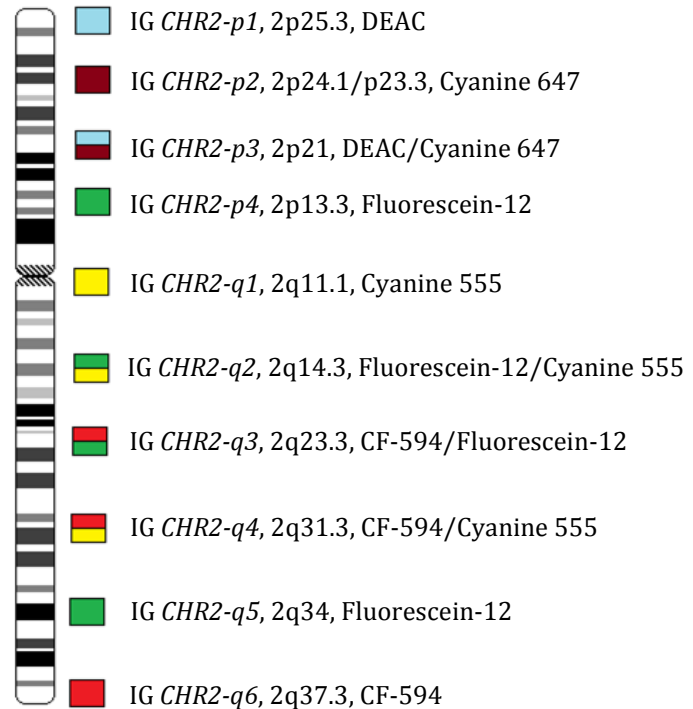

High Resolution Chromosome 2 probe is a multicolored chromosome mix which detects all numerical abnormalities and most balanced and unbalanced structural aberrations, including characterization of “add” and “marker” chromosomes. The labeled targets are equidistantly assigned down the length of chromosome 2.

Three variations of the HR Chromosome 2 Probe mix are offered:

- HR-2.1 Instant 15 minute Hybridization
- HR-2.2 Rapid 3 hour Hybridization
- HR-2.3 Overnight 16-21 hour Hybridization

HR Chromosome 2 probe mix hybridized to a lymphocyte.

Not drawn to scale.

ASR: Analyte Specific Reagent, analytical and performance characteristics are not established.
